Sriram Raghavan, PMP®

+919941374772 Sriram.r83@gmail.com

Experience

- **DXC Technologies** Apr 2010 – present Sr Analyst I Software Engineering
- **Wipro Technologies** Jan 2008 – Apr 2010 Senior Test Engineer
- **HCL Technologies** Mar 2005 – Dec 2007 Test Engineer

Profile Summary

- Certified Project Management Professional (PMP®) with 20+ years of experience in automation testing, data quality and reconciliation testing, API validation, and cross-functional project leadership

- Managed all aspects of successful project execution, including contract governance ,client expectation management and satisfaction, financial results, team performance and delivery of quality work. Directed, implemented, and managed manual / automated functional test procedures and processes: Scope definition, delivery estimates, automation library design, test scheduling, progress reporting ,script creation, execution and quality signoff.

- Proven expertise in designing enterprise-scale automation frameworks, leading high-performance QA teams, and delivering managed quality assurance services for Fortune 500 clients including Chevron Corporation, AT&T and Kaiser Permanente.

- Managed end-to-end QA for the solution delivery team by defining tailored QA processes for various project types, processes and technologies (SAFe, DevOps, PEGA, API, Azure Activity Functions, Storage Containers). Implemented a seamless QA integration for client's Mid Continental Business Unit's IT operations groups and applications

- Extensive experience in Selenium, UFT, API testing, Azure DevOps, ETL testing, and BOXI report testing across Energy, Healthcare, Telecom and Retail domains. Experienced in leveraging PySpark, Python, and Pandas for large-scale data validation, reconciliation, and Parquet/JSON dataset comparison. Core implementation skills in test automation using Selenium WebDriver, Java, TestNG, ADO, UFT 14.03, establishing Azure DevOps Pipelines, Repos

- Hands-on experience in leveraging AI-assisted tools such as GitHub Copilot and Model Context Protocol (MCP) to accelerate test design, automation development, and defect analysis. Applied AI techniques for log analysis, defect pattern identification, and supporting root cause analysis

- Proficient in developing Python-based validation scripts for JSON/Parquet data, supporting API testing and large-scale data reconciliation during middleware validation

- Led QA teams supporting the Company's solution delivery across regular, fast-track, and off-cycle releases. Managed and guided teams performing requirement ambiguity analysis, test scenario reviews with business analysts, test case preparation, test execution, and comprehensive defect triage and lifecycle management.

- Responsible for collaborating with Release Management to prioritize and plan actions effectively. Planned and coordinated quarterly Performance Service Review meetings with IT leadership to present insights on service performance, work volume and pace, resource planning, supported applications (custom and vendor), and solution delivery projects—enabling informed decisions and potential adjustments to align with Service Orders

Core Competencies

- **Project Management:** PPM, PSA, SAP Fieldglass, Agile (Scrum/SAFe)
- **QA Tools:** Playwright, Selenium WebDriver, UFT, TestNG, TOSCA, ALM, QC, PostMan
- **AI & Intelligent Automation :** GitHub Copilot, MCP (Model Context Protocol), Prompt Engineering, AI-assisted test scripting
- **Cloud & DevOps:** Microsoft Azure (Pipelines, Boards, Repos, DevOps, storage containers, Azure Application Insights),AWS S3
- **Programming Languages:** Java, Python, VBScript
- **Frameworks & Big Data:** PySpark; Automation Frameworks – Hybrid, Data-Driven, Modular
- **Libraries:** Pandas
- **Test Types:** Functional, Automation, Integration, Regression, Performance, UAT, ETL, API
- **Databases/Reporting:** SQL, SAP BOXI, Business Objects
- **Data Formats:** Parquet, JSON

Professional Certifications

- Project Management Professional (PMP)® – PMI
- AWS Certified Cloud Practitioner
- Microsoft Azure - AZ900 & AI900
- ISTQB – Advanced Level Test manager
- Tricentis TOSCA Automation Specialist Level 1
- Certified Scrum Master
- HP Accredited integration Specialist (AIS)

Rewards / Recognitions

- FY23 – Q4, FY23 Q2, FY22 Q1 DXC Champs Awards – for consistent commitment to excellence. Exceptional Impact performer for consecutive years
- Internal Facilitator Reward for contribution made towards Learning and development of the organization.
- DXC Recognition Emerald Award for extended support in Talent management
- Received Certificate of Merit from the DXC organization for the outstanding efforts in Automation for Kaiser Project

Engagement Summary

Project : Chevron MCBU Solution Delivery Applications (Nov 2017 to Till Date)
Client : Chevron Corporation, US

Role / Responsibilities:

- **Architected and delivered managed QA** services for Chevron's MCBU supporting 10+ custom applications and geological/geophysical platforms (OMNI Centaur,PLWOL, Joyn Middleware,TASQ, Energy Components, operations support)
- **Directed automation strategy and implementation** using Selenium WebDriver, UFT, and TestNG, building scalable frameworks for smoke and regression testing and improving overall test efficiency.
- **Managed cross-functional QA teams**, including hiring, onboarding, mentoring, and performance management, ensuring delivery against aggressive timelines and quality goals.
- **Managed full testing lifecycle** (functional, integration, system, UAT, regression, and production), ensuring quality across complex, multi-system environments.
- **Implemented robust QA processes and delivery models** aligned with SAFe, DevOps, API, and PEGA ecosystems, enabling seamless QA integration across enterprise IT operations.
- **Reduced critical defect leakage** through introduction of pre-release quality gates and automated regression suites for key applications.
- **Validated JSON and Parquet datasets using Python/PySpark** for JOYN and TASQ applications, ensuring high-quality input data for downstream AI/ML processing.
- Applied AI-assisted tools such as GitHub Copilot to **accelerate automation development, enhance test design, and support log analysis**.
- Performed **database and ETL validation**, ensuring data accuracy and integrity across business-critical workflows and deployments.
- **Managed project governance and delivery operations**, including planning, scheduling, scope management, and reporting using PPM tools.

- **Collaborated with stakeholders and leadership**, providing delivery insights, risk analysis, and performance metrics through regular status reports and service reviews.
- Conducted **Performance Service Reviews (PSR)**, Monthly Business Reviews, presenting workload trends, resource planning, and service performance to support strategic decision-making.
- **Managed QA financials**, including demand planning, cost control, and reporting across PPM/PSA/Fieldglass tools.
- Performed **account health governance (RAG status)** across scope, schedule, budget, and risks, delivering actionable insights to senior leadership.
- Oversaw **contract and resource management**, including work orders, timesheets, invoicing, and vendor coordination using SAP Fieldglass.

Other Engagements (AT&T, Kaiser Permanente, Insight, Wolters Kluwer – US . SGB- Australia)

Role / Responsibilities :

- Led QA efforts for ETL, data warehouse, and reporting systems, including validation of transformation rules, mapping logic, and Business Objects reports.
- Designed and implemented automation frameworks using UFT/QTP, enabling scalable regression and batch execution.
- Developed SQL-based and automation-driven validation techniques to ensure data accuracy and integrity across backend systems.
- Built test data generation and validation utilities to support ETL workflows and data warehouse testing.
- Automated security validation scenarios (user roles, access controls) and functional workflows across enterprise applications.
- Improved automation coverage and efficiency through reusable components, modular frameworks, and optimized scripts.
- Conducted automation feasibility studies and contributed to framework design and test strategy definition.
- Supported functional, regression, and integration testing, ensuring stability across releases.

EDUCATION

- Bachelor of Engineering in Electrical & Electronics , University of Madras , 2004 – 73.5 %
